

WHAT IF?

This sad little story says it all. Read it carefully!

Anytown, US - Bill and Alice never saw it coming. Suddenly Bill had a stroke and had to be admitted to a nursing home because his wife Alice could no longer take care of him. The children were spread across four different states with families of their own to care for and couldn't help much. Before they knew it, Alice went through \$176,642 of their life's savings in two and a half years to meet Bill's needs since neither traditional health insurance or Medicare pays for long-term nursing costs. Sadly, they didn't know they could have protected all of their money from being lost if only they had taken the time to find out HOW.

Yes, that's right! Bill and Alice COULD HAVE KEPT ALL OF THEIR MONEY, and Bill could have continued to receive the care he needed, had they known in advance, how to legally protect their hard earned savings WITHOUT having to "spend down" their assets.

THIS DIDN'T HAVE TO HAPPEN! Recent legislative changes now make it possible to **protect your savings** against devastating long-term care expenses. That's why it's critical to **GET THE FACTS!** Simply, return this postage-paid card TODAY for complete information, without cost or obligation.
